

# National *Gold* EDUCATION PROGRAM

Providing gold resources to schools across Australia

An initiative supported by Australia's gold industry

[Education.goldindustrygroup.com.au](http://Education.goldindustrygroup.com.au)

# GOLD CLASS SESSIONS

Our free Gold Class Sessions, led by experts from the gold industry, are designed to educate students on the significance of gold in our everyday lives. The gold industry plays a crucial role in supporting our communities, driving the economy, and shaping the future of Science, Technology, Engineering, and Mathematics (STEM).

## STEM

These 60-minute sessions are designed for a single class of up to 32 students, catering to upper primary (Years 4-6) and lower secondary (Years 7-10). Teachers often schedule multiple back-to-back sessions across different year groups to include everyone! In these interactive sessions, students will learn about the value and significance of gold while engaging in a hands-on activity. Our Gold Class Sessions help to reinforce and enhance the learning taking place in your classroom, providing practical insights and real-world applications. These sessions are offered in select locations across Australia.

## Careers

For senior students (Years 9-12), we offer an in-depth exploration of the diverse range of careers within the gold industry through the real-life experiences of our facilitators, as well as worker interviews and profiles. Each Careers Gold Class Session lasts 60 minutes and can be conducted in person or online anywhere in Australia.

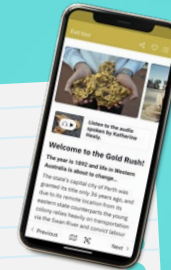

## Gold Resources Kits

Our Gold Resources Kits are available for order by any ACARA-registered school or library across Australia. Each kit is uniquely designed and includes rock samples from Australian gold mines, along with classroom materials and teacher resources aligned with the Australian curriculum. These kits provide a hands-on learning experience, sparking curiosity and enhancing students' understanding of the gold industry, while fostering a deeper appreciation for Australia's rich geological heritage.

## Heart of Gold Australia App

Our free interactive Heart of Gold Australia App features golden experiences to be explored across the country, including historic landmarks and famous attractions. The Perth and Kalgoorlie Heart Of Gold Discovery Trails on the App provide a virtual adventure through time for students and families to learn about the rich history and value of gold to the development of Australia.

The trails feature interactive content for all to enjoy and can be explored as an in-class activity or an excursion.

The National Gold Education Program is a Gold Industry Group education initiative. The Gold Industry Group connects Australia's gold industry to the community by leading long-term education, employment and community initiatives.
